## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 8,10-14 and 16-18 are allowed.
2. The following is an examiner's statement of reasons for allowance: Prior art shows a motor body comprising a output shaft projecting from a front end of the motor body, a power supplying terminal coupled to the motor body made of elastic material, a grounding portion disposed near a rear end of the motor body in a direction substantially orthogonal to the output shaft and a weight eccentrically secured to the output shaft. However, Prior fails to show a power supply terminal having a first portion extending substantially parallel to the output shaft, a bent section coupled to the first portion, curving outward and away from the motor body, the bent section immediately adjacent to the first portion and maintaining a position at least as far from the motor body as the first portion extending substantially parallel to the first portion: and a third portion comprising a grounding portion projecting outward in a curved manner from the second portion.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
